

Pelle Bruinsma

Programmer and Game Developer 🙌

I'm Pelle, a Dutch Programmer, Game designer and student looking for an Internship.

I've developed and published many smaller titles either myself or in collaboration within teams of 3-8 people. Playing and making games is something that really excites me. I want to reach beyond what I'm individually capable of, test and improve on my skills, work on bigger projects and on bigger teams. I believe that, given the opportunity, I could make some great contributions to your upcoming projects.

I'd love to meet with you and discuss any positions you have available. I look forward to hearing from you and thank you for your consideration.

Sincerely,

Pelle "Stupid++" Bruinsma
